FOR IMMEDIATE RELEASE

“Auto-In” 20mm Coin Cell Holder

Astoria, NY ... Automatic insertion of 2025 and 2032 Lithium Coin Cell Holders on dense PC Boards has been enabled by Keystone Electronics with its new “Auto-In” Holder - the latest entry in a series of auto-insertion products. This extremely rugged design securely retains cells under shock and vibration.

A low profile, compact holder suited for Surface Mount applications, it also inserts via most vacuum or mechanical pick-and-place devices.

Each “Auto-In” Holder is polarized and features dual-spring, Gold-Plated Phosphor Bronze contacts in a glass-filled LCP UL 94V-0 base. It is supplied in tape and reel, (Part# 1058TR) and in bulk (Part # 1058).

The company’s full line of battery hardware also consists of SMT and THM products including contacts, clips, holders, retainers and straps in assorted materials for coin cells and batteries. In addition to a comprehensive line of interconnect hardware and components. Keystone provides application engineering services for product modifications and special design requirements supported by pro-active stamping, machining and assembly operations.

Keystone is ISO-9001:2008 certified and RoHS, REACH compliant with USA headquarters and offices in Canada, Europe, Australia and Asia. For further details and to request literature contact (800) 221-5510 or (718) 956-8900; fax (718) 956-9040, Email: kec@keyelco.com or view www.keyelco.com.
