MICROPOROUS POLYMERS DIE CUT SHEETS, RODS AND TUBES

Submitted by Bill Bowles on May 1, 2013 - 11:10am

Custom die cut microporous PTFE, polyethylene, and polypropylene polymers for a wide variety of barrier, filtration, venting, and vacuum applications are available from Interstate Specialty Products, Inc. of Sutton, Massachusetts.

Interstate carries Porex® Porous Polymers which

feature a three-dimensional pore structure that comes in a wide range of pore sizes from 1 to 195 microns and various widths and thicknesses, depending upon material. Stocked as sheets, rods, and tubes in PTFE, polyethylene, and polypropylene, they can be converted and die cut into
